

EYDAP'S ENVIRONMENTAL POLICY

At EYDAP we manage, with responsibility and sensitivity, the most precious natural resource, water, and return it to nature clean, adopting the principles of circular economy, steadily reducing our environmental footprint.

For EYDAP, protecting the environment, transitioning to a low-carbon emission economy, addressing the challenges of Climate Change and contributing to the achievement of the Global Development Goals are a key part of its strategy. Its Environmental Policy is a pledge of its commitment to the principles of "Sustainable Development".

In carrying out its activities, EYDAP is committed to:

- to comply with the applicable Greek and European environmental legislation, concerning its operation and its products-services, by adopting approved international practices and standards in environmental management issues, as well as to strive to meet higher standards than those imposed by legislation and to cooperate with the competent bodies for the improvement of the legislative requirements..
- to prevent pollution through the systematic identification, assessment and control of all environmental impacts arising from its activities.
- to protect the environment through actions resulting from appropriate information, training and encouragement of all its employees.
- seek to minimise and safely dispose of waste generated on its premises by applying recovery, reuse and recycling techniques.
- constantly review the efficient use of energy in the light of new technological developments.
- establish, substantiate and review its environmental objectives, taking into account the requirements for continuous improvement of its environmental performance, technological developments, as well as economic and operational requirements.
- inform its suppliers and contractors working with it of the adoption of its Environmental Policy and ensure that they comply with it.
- aim to establish and maintain an open and creative relationship of trust with the local community and other stakeholders.
- to implement sustainable practices for the conservation of natural resources, in particular water, through systematic awareness-raising in society, the educational community, its customers and other stakeholders.
- to ensure the protection of biodiversity and ecosystems in the areas where it operates.
- make public its environmental performance.
- adapt to climate change by operating in an environmentally responsible manner, aiming to reduce its carbon footprint.
- promote innovation through research and development of new technologies and their gradual implementation in its production units.

The Environmental Policy stems from EYDAP's sensitivity and commitment to respect the environment and aims to minimize the impact of its activities on it.

It is communicated to its employees and stakeholders, reviewed and revised by the Health, Safety, Environment & Quality Directorate and approved by its Board of Directors.

**Approval by
the Board of Directors of EYDAP**
