Presentation of Financial Results for the first half of 2024 to Representatives of the Stock Market

The presentation of the financial results of the first half of 2024 of EYDAP to representatives of the stock market took place today, Thursday, September 26, via video conference. The CEO Haris Sahinis and the Director of Financial Analysis and Investor Relations Ilias Dedousis participated in the briefing.

The financial results of the semester were presented in detail, as well as the reasons that played a key role in their formation, such as the large increase in consumption due to the high temperatures that prevailed for long periods of time, which led to the rise in turnover and the stabilization of the operator cost.

Particular emphasis was placed on the Company's response to the drought and the consequent reduction of reserves in the reservoirs, on the measures taken and on the investments that will ensure both the sustainability of the Company and the uninterrupted provision of water and sewerage services.

With regard to the development of the Company, Law 5106/2024 of the Ministry of Energy and Environment gives particular flexibility to the Company, while with a new legislative framework, according to announcements by the Ministry of Environment and Energy, EYDAP is expected to expand to the rest of Attica, Boeotia, Corinth and Fokida and to further activate EYDAP Islands Development.

The investing public is informed that the Company's presentation is posted on the EYDAP website (www.eydap.gr) in the Investor Relations section .
